Professional Summary

Front-end-focused Software Developer with over 6 years of experience building accessible, high-traffic digital services for organisations including the BBC and Croydon Council.

Specialised in React, Next.js, JavaScript, and TypeScript, with hands-on backend experience using Node.js, Python, and Django. Proven track record improving performance (~20% faster loads), accessibility (WCAG 2.1 AA), and reliability (90% test coverage) in regulated UK public-sector environments.

Technical Skills

- Frontend: React, Next.js, JavaScript, TypeScript, HTML, CSS, SCSS, Tailwind
- Backend: Node, Express, Python, Django, REST API, PostgreSQL, SQL, MongoDB, Fast API
- Testing & Quality: Jest, Cypress, Playwright, TDD, WCAG 2.1 AA, Cross-browser compatibility
- Tooling: Git, GitHub Actions, GraphQL, CI/CD, Docker, AWS, Responsive design.

Professional Experience:

Full Stack Developer – Data Annotation (Nov 2024 – Dec 2025)

- Took multiple projects from idea to deployed applications, covering frontend, backend, and database layers
- Designed and implemented REST APIs in Django, including authentication, permissions, and database-backed workflows
- Worked with relational databases PostgreSQL / SQL, designing schemas and writing queries to support real application features
- Implemented client-side state management, form validation, error handling, and API integration

Full Stack Developer – Croydon Council (Aug 2023 – Oct 2024)

- Built responsive, cross-browser-compatible interfaces used daily by residents
- Improved page load times by around 20% by refactoring API logic and frontend rendering
- Helped bring several user journeys in line with WCAG standards, improving accessibility for users with assistive technologies
- Increased automated test coverage by roughly 35%, which reduced bugs after releases
- Took part in sprint planning, code reviews, and regular releases through CI/CD pipelines

Full Stack Developer – BBC (Jan 2023 – May 2023)

- Migrated parts of a large production codebase from JavaScript to TypeScript, which reduced runtime errors and made the codebase easier to maintain
- Built and released new features for high-traffic BBC platforms using React, Next.js, and Node.js
- Worked closely with designers and testers to meet WCAG 2.1 AA accessibility standards across key user journeys
- Helped raise automated test coverage to around 90%, improving confidence in releases

Front-End Developer – Freelance (Apr 2022 – Dec 2022)

- Delivered responsive React and Next.js applications for small businesses
- Implemented SEO and accessibility improvements aligned with WCAG standards

Junior Web Developer – QMQ Real Estate (Jul 2019 – Jul 2021)

- Built interactive UI components using JavaScript, HTML, and CSS
- Improved SEO visibility and resolved cross-browser issues

Education:

Makers Academy – Software Engineering Bootcamp

University of Technology, Baghdad – BSc Architectural Engineering

Languages: English (Fluent), Arabic (Fluent), Russian (Fluent).

Right to Work: British citizen – eligible to work in the UK without sponsorship.

Clearance: Eligible for BPSS.
