Professional Summary

Frontend-focused Software Engineer with 6+ years of experience building scalable, accessible, and high-traffic web applications for organisations including BBC and Croydon Council. Strong expertise in React, Next, TypeScript, with solid experience across Node.js and Python. Proven ability to improve performance, accessibility, WCAG, and reliability through testing and CI/CD practices. Comfortable collaborating closely with designers, product managers, and engineers in agile teams to deliver high-quality digital products.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind, Styled Components, SCSS, TanStack Query, Redux

Backend: Node.js, Express, Python, Django, Flask, REST APIs, GraphQL

Databases: PostgreSQL, MySQL, Firebase, Supabase, MongoDB, DynamoDB

DevOps & Tools: GitHub Actions, CI/CD, Jira, Trello, Webpack, GCP, AWS, Lambda, Serverless, Docker

Testing: Jest, React Testing Library, Cypress, Playwright, Vitest

Practices: Agile/Scrum, TDD, WCAG 2.1 AA, Responsive Design, SEO, GDPR, Figma

Professional Experience:

Independent Software Engineer (Jan 2025 – Jan 2026) Freelance contractor

- Delivered multiple production applications using React, TypeScript, and Python for clients under real production constraints
- Designed and implemented REST APIs in Django, including authentication, permissions, and database-backed workflows
- Worked with relational databases PostgreSQL / SQL, designing schemas and writing queries to support real application features and API integration
- Implemented client-side state management, form validation, and error handling

Full Stack Developer – Croydon Council (Aug 2023 – Oct 2024) Fixed-term contract

- Built responsive, cross-browser-compatible interfaces used daily by residents
- Improved page load times by around 20% by refactoring API logic and frontend rendering
- Helped bring several user journeys in line with WCAG standards, improving accessibility for users with assistive technologies
- Increased automated test coverage by roughly 35%, which reduced bugs after releases
- Took part in sprint planning, code reviews, and regular releases through CI/CD pipelines

Full Stack Developer – BBC (Jan 2023 – May 2023) Fixed-term contract

- Migrated parts of a large production codebase from JavaScript to TypeScript, which reduced runtime errors and made the codebase easier to maintain
- Built and released new features for high-traffic BBC platforms using React, Next.js, and Node.js
- Worked closely with designers and testers to meet WCAG 2.1 AA accessibility standards across key user journeys
- Helped raise automated test coverage to around 90%, improving confidence in releases

Front-End Developer – Freelance (Apr 2022 – Dec 2022)

- Delivered responsive React and Next.js applications for small businesses
- Implemented SEO and accessibility improvements aligned with WCAG standards

Junior Web Developer – QMQ Real Estate (Jul 2019 – Jul 2021)

- Built interactive UI components using JavaScript, HTML, and CSS
- Improved SEO visibility and resolved cross-browser issues

Education:

Makers Academy – Software Engineering Bootcamp

University of Technology, Baghdad – BSc Architectural Engineering

Languages: English (Fluent), Arabic (Fluent), Russian (Fluent).

Right to Work: British citizen – eligible to work in the UK without sponsorship.

Clearance: Eligible for BPSS.

References: available from the BBC and Croydon Council upon request.

Selected Personal Projects:

Caesar store - E-commerce solution engineered with Next.js, TypeScript, React Server Components, and MongoDB. Implements ISR (Incremental Static Regeneration) for optimal performance, multi-currency support, role-based access control, and secure payment processing via PayPal and Stripe. Internationalisation (i18n) English, Arabic, and French
